## ABOUT US

As a collaborative school community at P.S. 376, we are dedicated to providing a nurturing and stimulating learning environment with high academic and civic expectations for every student.

We are committed to developing students' talents and unique abilities. By integrating standards-driven instruction with a focus on science, 21<sup>st</sup> century technology, engineering, the arts and mathematics, we foster global and lifelong learning skills of collaboration, communication, critical thinking and creativity. Our students develop skills and competencies essential for success in a global community.

# OUR VISION

**We envision our Dual Language students becoming bilingual, bi-literate individuals who are productive global citizens as we move them towards college and career readiness.**

- ❖ Students are empowered to think, reason, investigate, communicate, and question through the integration of science, 21<sup>st</sup> century technology, engineering, the arts and mathematics in both English and Spanish
- ❖ Through the use of Project Based Learning, students further develop their talents and abilities in a bilingual setting
- ❖ Learning a second language further enhances cognitive development and encourages abstract, creative thinking, thereby increasing students' talents and abilities
- ❖ Knowledgeable, enthusiastic staff and encouraging parents collaborate to provide safe and rigorous learning environment for all students

# OUR MISSION

We at the Public School 376 Dual Language Enrichment Program pledge to build an environment that is conducive to creating bilingual, bi-literate students.

Our mission is to incorporate modern technology as well as the arts into rigorous, standard-driven instruction in English and Spanish. Through the use of Project Based Learning and with the support of technology, we strive to provide opportunities for students to become capable, resourceful, and adaptable global citizens.

# PROGRAM DESIGN

The Dual Language Enrichment Program at P.S. 376 follows a 50-50 model, with half of the instruction in English and the other half in Spanish. Literacy instruction in both languages will occur simultaneously. Mathematics instruction will be delivered in English. Students will also receive English instruction through Project Based Learning.
